DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 11-13, 15-16, 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Cho et al. (6,971,748).

Cho et al. discloses an image projection apparatus comprising:

a light source (31);

an illumination optical system for uniformly emitting light (Colm. 4 Lines 9-15) including a microlens array (34) commonly known to homogenize light and interpreted to have a plurality of windows formed of the individual lenses, each corresponding to a pixel of a light valve (33) for forming a plurality of image pixels;

a pixel shift wheel (plate) (35) for optically shifting the position of the pixels by rotating or pivoting about an axis.

As noted in Column 4 Lines 28-36 the light valve may be of any known type, such as a DMD device.

The pixel shift wheel may include a plurality of refractive surfaces as well as a non refractive surface area 35c-2.

Allowable Subject Matter

3. Claims 1-10 are allowed.
4. Claims 14, 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
